ABS Labour Scheduler

*Save Time *Easy-to-use *Accurate Staff Rosters
 *Optimise Wages ...with ABS Labour Scheduler!

ABS Labour Scheduler is a smart and very user-friendly program, custom designed to...

- Fully **streamline** staff rostering, saving time and effort while generating accurate, timely staffing schedules.
- Eliminate guess-work and **optimise** staffing and related wage costs, balanced to the effective rate of sales per operator, or unpacked cartons per night-fill person.
- **Auto-suggest** required staff per half-hour per sales area and for night-fill.
- Clearly list **available staff** (name, type, wage rate) per half-hour, so it's easy to make the right choices.
- Use the mouse and/or keys to easily and efficiently select and roster staff, with clear and **simple visual displays** making it a pleasure to use.
- Quickly and easily print **comprehensive staff rosters** well in advance, and extra sheets with wage times and values for back office/admin purposes.

Staff & Availability

Record staff details such as name, phone, memo, area (sales or night-fill), availability (days/hours available for rostering), exceptions (days/weeks not available), staff type (casual, fixed, permanent) and hourly pay rate (can set different rates, eg. for day, night, Sunday). Public holidays can also be set to display in the easy-to-use rostering calendar.

Times & Staffing Rates

Record store operating hours per day, maximum staff per department (eg. the number of POS lanes for front-end) and staffing rates (can be progressively fine-tuned): Sales per half hour per person per sales area (front-end, bakery, fruit & veg, butcher) and number of cartons per half hour per night-fill person.
