This is how software should be - affordable, powerful, flexible, with unique features, and above all EASY TO USE. Stores upgrading from other systems are always impressed with the huge improvements they get with RetailTouch...

- VERY EASY to learn and use.
- SAVES TIME across the board, eg. serving customers more efficiently, easily raising fast, accurate orders, and making end-of-day/month a breeze.
- Makes it easy to monitor prices, stock and sales performance, and to run the most effective customer incentives, directly helping to LIFT SALES AND PROFITS.
- MORE THAN PAYS FOR ITSELF through extra earnings and savings, eg. with faster sales, accurate pricing, improved efficiency and more options, eg. XPOS, hires and more.
- Quickly frees up time for owners to further IMPROVE their business and to take advantage of more opportunities.
- Adds a modern & streamlined presentation to your store, which always ADDS VALUE to a business.
- Provides a sound investment and PEACE OF MIND, with ABS's long and successful track record in top-line POS and business systems, with both large organisations and individual stores.

Some of RetailTouch's excellent and class-leading features...

- Fast & efficient, eg. for serving customers, accurate orders and for end of day & month.
- Quickly free up time to further improve the business and for more home/relax time.
- Your store will also present as being more modern and streamlined, adding value to your business.
- You'll have peace of mind in dealing with ABS, a long-term proven performer in top-line POS & Business systems - and with a POS system that is officially Metcash-IGA Accredited.
- EASY to monitor prices, stock and sales, and to run effective customer incentives.
- Fully flexible and configurable POS screen layouts, eg. add or move buttons, set colours and button/panel sizes, add new functions and Deals, display product & customer information – ie. streamline POS for maximum speed, ease-of-use and reliability, and fully minimise staff training.
- Unique and very easy to use Product Finder helps minimise delays at POS.
- Auto-fill POS panels, able to auto-match product images, eg. for fruit & veg, fast-food, bulky and non-scannable items (fast, easy).
- In-store promos auto-display on customer screens, eg. 17" LCD or plasma; can auto-match product images and current-sale info (excellent in-store advertising).
- POS checks items sold and auto-suggests available discount offers, eg. for multi-component Deals, Mix & Match, quantity-based price breaks and hosted or in-store promos (including time-of-day, day-of-week, customer and/or customer type) - so operators can scan products in any order.
- Smart Auto-stand-alone: If a problem occurs, eg. with cabling or a main PC, operations instantly continue, completely automatically - no delay and no user intervention needed.
- Smart Auto-Resume: When any hardware or system issue is resolved (eg. main PC restarted or cable reconnected), networking resumes completely automatically, including auto-merge of all transactions – again with no delay and with no user intervention needed.
- Customer/debtor accounts, statements, account keeping fees and early payment discounts (easy end-of-month, save time).
- Built-in Cash-book (reconcile your bank statements) and Electronic Banking (eg. for supplier payments).
- RetailTouch is built on a full General Ledger and all transactions are automatically and properly processed (double-entry accounting), with options to export to Myob and Sybiz, eg. for an external accountant if desired. Real time P&L, Balance Sheet and KPI reports are a click away!
- Report-Writer with automatic interface to Microsoft Excel - easy, powerful and flexible reporting. No need to rely on program mods to get the exact reports you need.
- Fast, efficient, real-time multi-stores – plus full off-site system management (eg. from home).
- Built in multi-business functionality, eg. fuel (POSTEC pump controller), car wash, hires (movies or games), hardware (timber & measured items), electrical, sports-leisure, fishing-camping, garden-nursery, rural-irrigation, clothing, gifts-souvenirs, newsagency, fast food, café, wine-gourmet, books-music, govt-tourism, bikes, spare parts, and many more (with quotes, customer orders, laybys and much more).
- XPOS and Tafmo on-line interface, to significantly lift profits with electronic item sales, eg. mobile phone recharges, transport, tickets, passes, etc.
